

For Sale, Two Slightly Used Skimmer Boxes

Both skimmer boxes were used for a short time, are in excellent condition, and are as complete as when purchased. The skimmer unit has a new filter and the 3 filters from the waterfalls unit have been used but are clean. Each has bulkhead fittings and can be used for 1 ½" or possibly 2" plumbing. The plumbing would need to be purchased separately. These units are very easy to maintain and filter water very well.

The units must be used with EPDM (pond liner) and have the aluminum bolts that attach the EPDM liner to each box unit. Instructions are included on how to install them to the EPDM liner for each of the units.

Sizes: The Waterfall Unit is 20" high by 22 ¼" long and 21" wide and the Skimmer Unit is 25" high 19 ½" long and 15 ½" wide. The units are constructed of rigid black plastic. Both boxes are rated for up to 1,000 gallons, but would be better suited for smaller ponds (less than 1,000 gallons).

If you are interested, please contact Jim Carlson at 303-777-6812 or jimcarlson55@comcast.net. Jim would like to donate the proceeds from the sale of the boxes to the Colorado Water Garden Society. All checks would need to be made payable to "Colorado Water Garden Society".

If you wish to see the skimmer boxes, they can be viewed at Jim's house. His address is 1675 S. Corona Street, Denver 80210.
